KPBS Request

From what I understand the 200k was allocated to the Police Department to spend from an account established by the City to implement RIPA, the monies are not transferred to the police department. Expenses are billed to this city account and unspent monies revert to the general fund when not used. Since we got the data collection application from the San Diego County Sheriff's Department, and didn't need to create our own and support it, we did not incur the anticipated costs and the monies revert back to the general fund.

Additionally, any monies we spent should have a purchase order or record, I am trying to obtain that document for you. However, I have three sizable presentations to give tomorrow and they are not finished so I don't have the time at the moment to track the document down today. I may have time tomorrow between presentations, I will try.

Jeff
